

NEW CANOPY FOR 5 SPEED REMOTES

Dear Retailer

We know by now you are all loving the **new 5 Speed Remote Controls** and especially all the **added features** that come with it like the option to **pair more than one fan to a handset** and the **timer functions** but as with any improvement, they are accompanied by changes.

The **upgrade from a 4 speed receiver to a 5 speed** resulted in an **increase in size of the receiver unit**, this meant that the **receiver will have to sit within a larger canopy (cup)**.

In order to accommodate the larger receiver, **all fans ordered with remote controls will come with a larger 'wine glass' shaped canopy** which is big enough to house the receiver.

We kindly appeal to you, to ensure that **your sales team is aware of this change** and that they will be mindful to check that they **supply the larger 'wine glass' shaped canopy** with all remote control orders.

Below is an example of the **old vs new canopy with the receiver** so you can see the differences.

Thank you for your assistance in this matter, it is greatly appreciated!

The Solent Team

OLD Canopy with 5 Speed Receiver Unit

NEW Larger Wine Glass Shaped Canopy with 5 Speed Receiver Unit

Position of 5 Speed Receiver Unit in LARGE Top Canopy

LARGE Top Canopy with SMALL Bottom Canopy

From the pics above, its clear to see how snug the receiver fit is in the old canopy and how comfortably it fits in the new wine glass shaped canopy, making installation a breath of fresh air!
